

ACO 2017 Quality Performance Report

Table 1. Summary Information

Domain	Points Earned without Quality Improvement Points	Quality Improvement Reward Points [1]	Points Earned with Quality Improvement Reward Points [2]	Domain Score	Quality Performance Standard Status [3]
Patient/Caregiver Experience	16.00	Not Applicable	16.00	100.00%	Completely reported on 100% of measures
Care Coordination/Patient Safety	18.00	Not Applicable	18.00	100.00%	Completely reported on 100% of measures
Preventive Health	16.00	Not Applicable	16.00	100.00%	Completely reported on 100% of measures
At Risk Population	8.00	Not Applicable	8.00	100.00%	Completely reported on 100% of measures

Initial ACO Overall Quality Score [4]:	100.00%
ACO completely reported on 100% of measures:	Yes
ACO achieved minimum attainment on at least one measure in each domain:	Not Applicable
ACO achieved minimum attainment on at least 70% of measures in each domain:	Not Applicable
QMV Audit Overall Match Rate [5]	96.00%
Final Overall Quality Score [6]	100.00%

Notes

- [1] ACOs beyond the first year of their first agreement period can earn a maximum of 4 quality improvement reward points per domain. Please note, quality improvement can only be calculated for measures with 2 consecutive years of reported data.
- [2] ACOs cannot earn more than the maximum possible points in each domain.
- [3] "Minimum Attainment" defined as 30 percent or the 30th percentile of the performance benchmark for P4P measures and complete reporting for P4R measures.
- [4] ACOs in PY1: An Overall Quality Score of 100% is indicative of complete reporting. For ACOs beyond the first year of their first agreement period, the ACO Overall Quality Score is calculated by averaging the four domain scores.
- [5] Equal to your ACO's QMV audit match rate (i.e., total number of audited records that match the information reported in the Web Interface divided by the total number of records audited). For ACOs that participated in the QMV Audit, more information can be found in Table 6 and in the detailed audit report that was delivered on July 25, 2018.
- [6] Equal to Initial ACO Overall Quality Score if ACO's QMV Audit Overall Match Rate was at least 90%. Else, equal to Initial Overall Quality Score × QMV Audit Match Rate.

Notes

[1] CAHPS measures combine responses to several questions, some of which have different response options (e.g., never, sometimes, usually, or always, and yes, definitely, yes, somewhat, or no). Performance rates for CAHPS measures do not represent a percentage but rather your ACO's mean (average) performance for each measure and is presented on a 0-to-100 scale. A higher CAHPS measure performance rate indicates that beneficiaries in your ACO were more likely to report positive experiences. For more information, please see the detailed CAHPS report that accompanies this report.

[2] A domain improvement score of at least 90% receives 4 Quality Improvement Reward points; ≥80% receives 3.56 points; ≥70% receives 3.12 points; ≥60% receives 2.68 points; ≥50% receives 2.24 points; ≥40% receives 1.8 points; ≥30% receives 1.36 points; ≥20% receives 0.92 points; ≥10% receives 0.48 points. A domain improvement score less than 10% receives 0 Quality Improvement Reward points.

[3] An ACO will be held harmless if their performance on a measure significantly declined, but remained above 90% (or in the case of certain measures, above the 90th percentile benchmark) in both the current year and previous year.

[4] For P4P measures: Points are calculated based on the ACO's performance compared to the 2017 quality measure benchmarks; For P4R measures: Full points are awarded if the ACO completely reports.
